Preventing Type 2 Diabetes Among High-Risk Youth

Margaret Grey, DrPH, RN, FAAN
Dean and Annie Goodrich Professor
Yale University School of Nursing

Friday, May 8, 2009 • 2:00–3:30 p.m.

1306 Health Sciences Learning Center • 750 Highland Ave. • Madison, Wisconsin

A pediatric nurse practitioner, Dr. Margaret Grey has focused her research on the adaptation of children with diabetes mellitus and the study of behavioral interventions to improve metabolic control of diabetes and to advance the quality of life in young people and their parents. Preventing type 2 diabetes in high-risk youth is her most recent scholarly interest.

Dr. Grey holds a bachelor's degree from the University of Pittsburgh, a master's degree in pediatric nursing from Yale University, and a doctorate in public health and social psychology from Columbia University. She was elected to the Institute of Medicine in 2005. Dr. Grey is also a Distinguished Fellow of the National Association of Pediatric Nurse Associates and Nurse Practitioners and a Fellow in the Society of Behavioral Medicine.

Supported by the Helen Denne Schulte Trust of the UW–Madison School of Nursing
One of the Spring 2009 Lecture Series sponsored by the Wisconsin Initiative to Prevent Obesity and Diabetes (WIPOD)
