The CRISP query tool which provides a searchable database of biomedical research projects funded by NIH will be retired Oct. 31, 2009.

For many years, CRISP was one of the most common ways for the public to find information on NIH research programs, returning extensive results on scientific topics. CRISP played an important role in its lifetime and won several awards.

With CRISP's impending retirement, we are glad to offer an exciting replacement in the form of the RePORT Expenditures and Results (RePORTER) tool.

RePORTER is available immediately and offers all the features of CRISP and more! It provides:

- A description of the award (abstract) and NIH funding for each project
- Publications and patents that have resulted from NIH-funded research.

New features will be added to RePORTER in several releases throughout fiscal year 2010.

We encourage you to start using RePORTER today!

*For questions on RePORTER*, please contact the RePORT team at report@od.nih.gov. *For questions related to CRISP*, please contact the eRA Help Desk at http://ithelpdesk.nih.gov/eRA/ (Preferred method of contact); 301-402-7469; helpdesk@od.nih.gov.

Help us improve our communications; send your suggestions and feedback to eRACommunications@mail.nih.gov or call 301-435-8185.
