SPRING 2013 SEMINAR SERIES

Discovering Novel Wildlife Health Information

Megan Hines
Technical Manager, Wildlife Data Integration Network (WDIN)

Cris Marsh, MLS
Content Manager, WDIN

Vicki Szewczyk, MBA CPA
Administrative Manager, WDIN

Tuesday, January 29, 2013
5:00-6:00pm
Room 1309 Health Sciences Learning Center

This presentation will showcase the information products and services that the WDIN develops to standardized disparate, varied wildlife disease data and information so that they can be integrated, disseminated and visualized. It will be explained how this aggregated publicly available information is made accessible to researchers and decision makers to enable them to gain new knowledge and a better understanding of wildlife health issues in support of the One Health Initiative.

Students, faculty, staff, community members—all are invited to attend. The #80 campus bus stops in front of the Health Sciences Learning Center.

The Global Health Seminar Series exists to raise awareness, stimulate interest, and bring visibility to global health efforts underway at the University of Wisconsin and beyond, and to provide opportunities for networking and development of new global health initiatives. Questions? Call or email Betsy Teigland at 262-3862, teigland@wisc.edu.

To view the seminar approximately one week after the event, please see the Innovations in Medical Education Video Library at: http://videos.med.wisc.edu/event.php?eventid=9.
